Usdoj,

When I retired I made microsoft stock the heart of our joint retirement because I believed that this company represents the future america where service rather than production will be our world wide contribution. The government through there failure to settle this case has and continues impact the lives of us retired citizens. Please settle this case so that our lives arenot impacted in such a negative way. Microsoft has done more to make life better for all american citizens, then any other company that I can recall. The settlement as I understand is fair and should be finalized. Thank you, James E Willems, Age 75
